DEFENDANT,

**COMPLAINT**

Dear Federal Judge:

I am filing a civil (miscellaneous) case in the United States District Court of Sacramento. With it I am trying to get the US Military to release documents in regard to my biological father. I am therefore asking you to sign the enclosed subpoena, as requested by to the Army & Air Force Exchange Service.

A little bit about my background and reason for my request: I was born 1953 in Germany to a German unwed woman. In 1954 my mother married US Army Officer Norman Dunlap and in 1955 I was adopted by him.

My mother passed away 1995 and my father 2004. Almost immediately after my father passed away, rumors surfaced that my father was not my biological one. I had DNA testing done confirming that this was the case. I was kind of surprised because I had considered him my real father and felt was never treated differently than my four other brothers.

I knew about my adoption but my mother always 'swore' that it was for 'international law reasons'. With that she meant that American military personnel were not allowed to marry German nationals after the war and as soon as this law was dropped they married. And then it took awhile afterwards to get the whole adoption procedure on track.

I started asking my German side of the family for any information about my story. Slowly I gathered that there was another American, who was my wife's boss and whose name was Mulvihill (I know no first name – nothing else). Both my mother and he worked at the Army & Air Force Exchange Service (commonly known as PX but at that time called EES [Eucom

Exchange System]) at the US Army Grafenwöhr Training area and Weiden, both in West Germany.

I also had additional FamilyTree DNA testing done to possibly find out if I had other relatives out there and to confirm the rumors that Mulvihill was my biological father. I only had partial success, I was officially added to the Mulvihill clan (allesel at DYS448=17) but it didn't produce any close relatives.

Now I see my only chance in the release of the complete name of my mother's supervisor along with information about his Social Security Number, to find out if he is still alive and to give closure to the unanswered chapter of my life.

I have enclosed as documents:

Army & Air Force Exchange Service denial of information request with letter

Communication with Mulvihill clan

Adoption papers

Death certificates for my parents

Birth certificates for myself

Family tree DNA results

Paternity Analysis Report

Thank you for considering my case  
Sincerely,

Eugen Dunlap

Hi Eugen,

Got it. You are officially a Mulvihill!  
The key result is the allele at DYS448=17.  
I've registered you with Clan Mulvihill (latest newsletter attached) and put you on the mailing list.  
Be back to you later with more info (running out to dinner and a show).

Hi Eugen,

Welcome to Clan Mulvihill. Your name and email have been added to our Newsletter distribution. I've also attached another copy of our latest issue.

We are an independent organization of volunteers, registered with the government-sponsored Clans of Ireland, Ltd. in Ireland. Our goals are to enable Mulvihills throughout the world to meet and interact with each other for the purpose of exploring our common heritage.

The Clan spans more than just the Mulvihill surname. It covers the Corca Achlann tribe which is the legendary source of the Mulvihills and the Brennans, and encompasses those Mulvihills that adopted the surnames Mitchell, Mulville, Melville, and others during the period of English persecution.

There is currently no annual fee for Clan membership, although at some time in the future we may enact a nominal fee structure to offset costs currently borne by the volunteer membership and officers.

The Clan publishes a newsletter, the Mulvihill Voice, on a quarterly schedule. The newsletter is emailed free to all members. Contact Editor Mary Ann Mulvihill-Decker at [MulvihillVoice@Hotmail.com](mailto:MulvihillVoice@Hotmail.com) with any questions or suggestions, or if you need hard copies by conventional mail. We are constantly seeking articles for publication, family notices, pictures, or any other information which would be broadly of interest to the Clan membership. Your participation is vital and appreciated

The Clan currently organizes and runs one Gathering each year. So far, these events have been held in Ireland, at the historic original homeland of the Mulvihill Clan, in County Roscommon. This was the home territory from the fourth-fifteenth century. The 2007 Gathering was held on Jun 30-Jul 1 in the County Kerry/ Clare region of Ireland, which has been the area of highest concentration of Mulvihills since the early nineteenth century. We explored local sites of interest to the Clan, such as the former location of the only castle in our history, DoonMulvihill, the home of the last Clan Chieftain, and conducted lectures on Mulvihill history and genealogy. And who can forget, all that laughter and music!!!

The Clan website, located at [www.ClanMulvihill.net](http://www.ClanMulvihill.net), is currently under development. We hope ultimately to develop the site as a resource base for genealogy researchers, as well as a chronicle of Clan activities. Please direct any comments, suggestions, or offers of assistance to our Webmaster, James Mulvihill, Jr., at [JMulvihill@sis.us](mailto:JMulvihill@sis.us). Until our website is fully functional, you are invited to visit my personal site at

[www.Mulvihill.net/genealogy](http://www.Mulvihill.net/genealogy) for more information on Mulvihill history.

We have started a Genetic Genealogy program to augment conventional studies and provide a path to investigating our ancestry over the course of the millennia. The initial phase consists of analysis of Y chromosome DNA from males. No privacy or medical issues are involved. The test indicates family association over hundreds of generations and is designed to probe the number and location of family groups within the Clan at various points in time. All members are encouraged to participate in this new and most exciting technology. The Clan has a special website for this activity located at [www.familytreedna.com/public/mulvihill/index.aspx](http://www.familytreedna.com/public/mulvihill/index.aspx)

Once again, we are pleased and honored to have you join with us as we grow and explore the fascinating history of one of the oldest surnames in the world. We welcome your active participation.

Yours truly,

James Mulvihill

# FamilyTreeDNA Certificate – Y-DNA

This Certificate confirms that you have had your DNA analyzed by Family Tree DNA. The outcome from each of the thirty-seven Loci examined is reported in the table below.

For your benefit we have listed the Locus designation for all thirty-seven Loci utilized by the geneticists supporting our company. If your alleles for the thirty-seven Loci match another person exactly, then you share the same Haplotype.

Family Tree DNA is a genealogical tool designed to aid individuals wanting to "connect" to other relatives lost in time and where the paper trail no longer exists.

### Paternity Analysis Report

Case Number: T020746

Originator Number: P036363

Report Number: R115855

**Relationship:**

Biological Mother

Child

Alleged Father

**Name:**

Not Provided

Eugen Dunlap

Norman E. Dunlap

**Date of Birth:**

8/24/53

8/17/27

**Ethnicity:**

Caucasian

**Collection Date:**

7/6/04

7/6/04

**Results:**

Norman E. Dunlap is excluded from being the biological father of Eugen Dunlap.

Combined Parentage Index (CPI): approximately 0

Probability of Paternity: approximately 0.0%

**Summary And Interpretation Of Results:**

Based on the results from the 15 genetic systems (loci) shown below, Norman E. Dunlap is excluded from being the biological father of Eugen Dunlap because they only share alleles at 6 of the 15 loci analyzed. A CPI greater than 100, representing a Probability of Paternity greater than 99%, is required in order to not exclude the alleged father from being the biological father. The CPI is approximately 0 for this case, resulting in an approximate 0.0% Probability of Paternity for this case.

This information is confidential. Deoxyribonucleic acid (DNA) was isolated from the specimens submitted for each of the study participants and was characterized using the polymerase chain reaction (PCR) for the genetic systems (loci) listed above. The associations of name, relationship and ethnicity with the accompanying results rely strictly on the information provided to the laboratory. GeneTree is not responsible for the origin and/or transport of the samples prior to arriving at GeneTree. The collection of specimens for the purpose of generating the data shown above was not performed in compliance with established Chain-Of-Custody guidelines.
